

Fujitsu Computer Systems Corporation

Legal

Time is expensive in your profession. A case can bring you to many locations, involve a variety of co-workers, and require your services any time of day. Fujitsu is there to ensure you can deliver maximum value to your client for every billable hour - while keeping an eye on the bottom line. Fujitsu makes the technology that fits into your fast-paced schedule and makes the most of everyone's time. Notebooks and tablets from Fujitsu are built to deliver anytime, anywhere.

Document Management

Legal pads are thick and long so you can fill them full of handwritten legal notes, which then must be organized and transcribed into digital form. We say, leave the pad in your desk and join our technology revolution. Fujitsu Tablet PCs will revolutionize the way you work: take unobtrusive handwritten notes directly on the screen of our Tablet PC when talking face-to-face with clients, witnesses, experts, and colleagues. Our Tablet PCs can later convert your handwritten notes into typed text for use in other applications with electronic search capabilities. Replace the ubiquitous legal pad with digital data and reign in the paper chase to your team's advantage.

Stay Connected in Court

Fujitsu offers notebooks small enough to carry discreetly into the courtroom. Our systems provide a wireless connectivity capability to allow you to have ready access to critical case files and relevant reference materials. Instant messaging and email allow ready communications with everyone involved with your cases.

Research and Deposition

Staying on top of case logistics and research is a never ending task when practicing law. Use short periods of downtime to the best advantage. With the bright displays and sensitive pen-based input of a Tablet PC from Fujitsu, you can quickly review and annotate case notes and background material. When it comes time to make your courtroom presentation, connect a projector to show material vital to your case to best advantage. Use digital inking capability to annotate these files directly on screen to emphasize and highlight key points of interest for the judge and jury.

About Fujitsu

There are countless industries and thousands of occupations where the majority of the work isn't done behind a desk. As the premiere provider of ultra-mobile computers, Fujitsu is supporting this exciting migration from the desktop—with wireless and security features throughout our product lines. Not only are we one of the world's top computer companies, we're also the undisputed leader in pen-enabled computers with over a decade of experience.

From Tablet PCs to pen-enabled notebooks, to a wide selection of conventional notebooks, Fujitsu offers the industry's most complete range of mobile solutions designed specifically to help those on the go effortlessly access, create, analyze and share information anytime, anywhere.

As a leader in the mobile computing market, Fujitsu offers a wide selection of highly versatile notebooks and pen-enabled products designed for true mobility. Whether you're looking for a thin and light notebook for your paralegal team or a Tablet PC for your trial attorneys, you can be confident in your investment in a Fujitsu product. Through the close integration of our design, manufacturing, and service engineers, Fujitsu creates some of the highest quality products offered in the PC market.

Tablet PCs

Stylistic® ST Tablet PC

The Stylistic ST Series Tablet PC is the result of 18 generations of Fujitsu pen-enabled products and leads the industry in configuration flexibility. With two types of digitizers for pen input, three supported operating systems, an optional wireless keyboard, and a choice of either a standard or indoor/outdoor viewable 10.4" display, the Fujitsu Stylistic ST4000 Tablet PC will help you make your case whether you're presenting in the courtroom, working in the office, or taking notes in the field. Give your legal team the technology advantage with the Stylistic ST4000 Tablet PC.

LifeBook® T Series Tablet PC

When you want the best of both worlds: the ease and functionality of a traditional notebook and the versatility of tablet, we can make a strong case for our LifeBook T Series Tablet PC. Transform this notebook into a tablet configuration by simply rotating and folding over the screen. You can use the stylus to make discreet notes or drawings with digital ink when talking with clients, witnesses, or colleagues. Then tilt up and rotate the screen back to notebook configuration to create case reports using the keyboard. The stylus and active digitizer will still work in this mode to allow you to make annotations to your paralegal's research notes.
