Data Sheet

Fujitsu Compact Appliance for the SAP HANA® Platform

Pre-configured and optionally pre-installed infrastructures for real-time data access with SAP Business One analytics, powered by SAP HANA and SAP Business One application, version for SAP HANA

Introduction to SAP HANA Offerings for SAP Business One Customers

The rapidly growing amount of data does not only have an impact on large enterprises. Small and medium size organizations face similar challenges. The mass of data they have to deal with may be less extensive, but the complexity of different data types from various sources requires corresponding processes. Hence SAP provides such organizations with solutions based on innovative in-memory technology:

Side by side approach for existing customers

Customers who already use the SAP Business One solution, may add the SAP Business One analytics powered by SAP HANA add-on, to accelerate analytics and reporting.

Integrated solution for new customers

New customers already benefit from the SAP Business One application, version for SAP HANA. This is an integrated approach which combines the proven SAP Business One functionality with the innovative SAP HANA database in one system.

Introduction to the Fujitsu Infrastructure and Service Offering

Fujitsu supports existing and new SAP Business One customers with SAP-validated infrastructures based on cost efficient industry standard PRIMERGY® servers.

Server Options

Depending on the individual office or data center proximity, customers can choose between a tower model PRIMERGY TX 300 S8 or a rack option PRIMERGY RX350 S8. Both models are equipped with two Intel® Xeon® E5-2670V2 2.5GHz CPUs and can be provided with 64 GB, 96 GB, 128 GB or 256 GB main memory.

Staging Options

The complete appliance offering consists of the I/O optimized server infrastructure pre-installed with the SUSE® Linux® operating system and the selected SAP software stack (currently only available for SAP Business One analytics powered by SAP HANA). The dedicated SAP HANA staging center in the award winning Fujitsu factory in Augsburg, ensures a highly professional pre-installation of the listed software components with optimal hardware settings. However the SAP—validated infrastructure can also be obtained without any pre-installation or with just the SUSE Linux operating system implementation.

Complementary Service Offerings

A set of optional services complements the implementation of in-memory technology in SAP Business One projects e.g.:

- SAP Business One Migration
- Hardware installation service
- Extended hardware maintenance
- Extended SUSE® Linux® maintenance
- Financial services

Green IT
## Features & Benefits

<table>
<thead>
<tr>
<th>Main Features</th>
<th>Benefits</th>
</tr>
</thead>
<tbody>
<tr>
<td>■ PRIMERGY rack and tower option</td>
<td>■ Choice of best fit for customers’ data center environments</td>
</tr>
<tr>
<td>■ Four main memory options (from 64GB up to 256GB)</td>
<td>■ Right size for all different project sizes and growth plans</td>
</tr>
<tr>
<td>■ Server pre-configuration and installation</td>
<td>■ Optimized hardware settings to leverage SAP HANA functionality</td>
</tr>
<tr>
<td>■ Optional factory staging (SAP HANA software and/or SUSE Linux)</td>
<td>■ High quality pre-installation for rapid and non-disruptive project implementation</td>
</tr>
<tr>
<td>■ Free choice and combination of server, staging and complementary service options</td>
<td>■ Solutions tailored to individual needs regarding size, implementation process and operation</td>
</tr>

## Software

**Operating system**
Operating System SLES11SP3 with kernel 3.0.93-0.8-default

**SAP Business One analytics software (optional)**
Operating System SLES11SP3 with kernel 3.0.93-0.8-default

- SAP HANA DATABASE 1.00 revision 67
- SAP HANA CLIENT 1.00 revision 67
- SAP HANA STUDIO 1.00 revision 67
- SAP B1A V1.1_PL03 Disk: B1A11_3-10012192

The SAP software can be optionally supplied pre-installed, but it is not part of the contact with Fujitsu. The software must be purchased by the customer from SAP AG.

Only the specified SAP HANA software can be pre-installed. Any other SAP software is provided by the customer and installed at the customer site. The preinstallation of SAP Business One powered by SAP HANA software is temporarily not available.

## Delivery, Implementation, Documentation & Support

**User interface**
English

**Installation**
Optionally supplied pre-installed ex works.

**User requirements**
Knowledge of SAP Business One software is a prerequisite.

**Warranty Class:** C
Only warranty ensured by components

**Media Set/ Documentation**
1 Blu-ray™ and installation guide

**Ordering and delivery**
This offering is available from authorized Fujitsu distributors or regional branch offices of Fujitsu.
About Fujitsu America

Fujitsu America, Inc., is a leading ICT solutions provider for organizations in the U.S., Canada and the Caribbean. Fujitsu enables clients to meet their business objectives through integrated offerings and solutions, including consulting, systems integration, managed services, outsourcing and cloud services for infrastructure, platforms and applications; data center and field services; and server, storage, software and mobile/tablet technologies.
